

S SAHANA

Generative AI Engineer | AI/ML Engineer | Python Developer

Bengaluru, Karnataka | +91 7338263669 | sahanassrinivasgowda@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Recent Computer Science Engineering graduate with hands-on experience building Generative AI applications using Python, Flask, REST APIs, and Large Language Models (OpenAI, Google Gemini, and Groq). Shipped a production LLM integration end-to-end from backend API design to frontend delivery automating cybersecurity incident analysis. Co-authored a peer-reviewed research paper on real-time deepfake detection. Strong analytical and logical problem-solving ability, with proven capacity to work independently and deliver working software end-to-end..

TECHNICAL SKILLS

Languages: Python, JavaScript, Core Java, C

Generative AI / LLM: OpenAI API, Google Gemini API, Groq API, Prompt Engineering, REST API Integration

Machine Learning / Deep Learning: PyTorch, CNN, LSTM, EfficientNet, MTCNN, Deep Learning

Web & Backend: Flask, React.js, REST APIs, HTML, CSS, Bootstrap

Data & Databases: MySQL, MongoDB, Oracle, Supabase

Tools & Practices: Git/GitHub, Postman, VS Code, Figma, SDLC, OOPs, Vercel, Bolt

EXPERIENCE

Gen AI Intern — Incident Evidence Locker (AI Dev 2 Contributor) | *CampusPe* Mar 2026

React.js, Flask, REST APIs, Groq LLM, Prompt Engineering, Tailwind CSS, Git/GitHub

- Designed and developed a Generative AI application by integrating Groq LLMs with Flask REST APIs, automating cybersecurity incident analysis and generating AI-driven recommendations and reports.
- Implemented prompt-driven backend workflows for evidence upload, structured JSON data processing, and secure API communication, streamlining incident management.
- Collaborated across frontend and backend to deliver an end-to-end AI solution, connecting a React interface to LLM-powered services and reducing manual analysis effort through automation.

PROJECTS

A Unified Neural Framework for Real-Time Deepfake Detection | *Published, IJRASET 2025* Sep 2025

Deep Learning, PyTorch, CNN, LSTM, EfficientNet, MTCNN, Python

- Co-authored and published a peer-reviewed research paper on a CNN-LSTM deep learning framework integrating EfficientNet and MTCNN for real-time, multimodal deepfake detection.
- Preprocessed and augmented the DFDC dataset, then trained and fine-tuned EfficientNet and CNN-LSTM models in PyTorch, achieving high detection accuracy.

Travel Listing Web App | *Personal Project* Jun 2025

MySQL, JavaScript, HTML, Bootstrap

- Built a full-stack travel accommodation booking platform (Airbnb-style) with user authentication and listing management.
- Engineered a scalable RESTful API backed by MySQL, cutting data retrieval latency by 20%.

EDUCATION

B.E., Computer Science Engineering — CGPA 8.01 | *Sapthagiri College of Engineering, Bengaluru* Dec 2022 – Jul 2026

Pre-University Education (CBSE) | *Kendriya Vidyalaya IISc, Bengaluru* 2020 – Aug 2022

ACHIEVEMENTS & CERTIFICATIONS

- 1]Introduction to Generative AI Google Cloud Skills Boost
- 2]Open-source contributor, GirlScript Summer of Code 2025
- 3]Postman API Fundamentals Student Expert Certification
- 4]Web Development Certification (Udemy)
- 5]Cisco Networking Academy — CyberOps Associate Certification (2025)
